

Benefits of Membership

Be an Industry Leader

Working Together— Key to Success at the Federal and State Level

Members of the American Association for Homecare help ensure that the HME sector has a strong voice in Washington to lead the fight for better government policies.

AAHomecare works on many fronts to protect HME providers from reimbursement cuts, address operational practices, and ensure patient access to Medicare, Medicaid, and other payers. The Association leads the fight to mitigate the impact of competitive bidding, demonstrates the value of homecare in the media, pushes back against unreasonable audit practices, and advocates to protect the HME infrastructure and ensure that homecare is a viable option for individuals relying on HME to safely live at home.

AAHomecare also offers member-only access to information and analysis; discounts on professional development programs, and networking and leadership opportunities in the organization through councils and task force groups.

But, the Association cannot meet the challenges ahead without its members. All dues to AAHomecare directly support lobbying, research, and public awareness efforts that are part of our advocacy program.

“For me and with our company, I feel like now I have this network of professionals that I trust, that are extremely knowledgeable and that are willing to share best practices and pitfalls to avoid in the industry. And I feel like they’re just down the door through this membership. It’s really impressive!”

Lisa Wells
Med-South, Inc (AL)
